

The class in general did not have many questions, why?

The review sessions did not cover much material, should new material have been covered (possibly outside the scope of the tests) or should old material have been reviewed. If a review how should material have been chosen for the review?

What did you think of the integration session?

What did you think of the review questions?

What did you think of the powerpoint lectures?

What did you think of the non-powerpoint lectures?

What topic(s) do you think should have been covered in greater depth?

What topic(s) do you think should have been covered in less depth?

What could be done to improve the class in the future?

What is the most useful thing you learned in this class?

What did you think of the teams?

How could communications between the teams be encouraged/improved?

How could individual effort be better assessed?

Thanks, and best of luck in your other classes and life.
